NYUYDZE BANVEN ERIC JUNIOR

SOFTWARE ENGINEERING | WEB DEVELOPMENT | AI-ENABLED APPLICATIONS

Yaoundé, Cameroon • +237 673 491 464 • banven100@gmail.com • github.com/BANVEN-subzero

PROFILE

Software Engineering Master's student at the College of Technology, University of Buea, with a developing background in web application development, programming, and AI-enabled digital products. Interested in building practical, user-focused software and exploring how technology can support cultural preservation, personal finance, e-commerce, and access to understandable information. Has completed two internship periods at Digimark Consulting SARL and continues to build skills through project-based learning.

EDUCATION

Master’s Programme in Software Engineering

College of Technology, University of Buea, Cameroon | Currently enrolled

Bachelor of Technology in Software Engineering

University of Buea, Cameroon | Awaiting completion/graduation

Reported GPA: 3.40

INTERNSHIP EXPERIENCE

Software / Web Development Intern — Digimark Consulting SARL, Cameroon

July–September 2024 and July–September 2025

- Gained practical exposure to programming and web-development workflows through guided exercises and project work.
- Practised C++, HTML, CSS, JavaScript, Java and Python, alongside introductory database and web-application tasks.
- Worked on the TryOns / Tryon Space AR e-commerce project concept, focusing on responsive frontend interfaces and some backend integration.

SELECTED PROJECTS

CULTIA — Cultural Heritage and AI Integration Platform

A project focused on helping users explore and learn about Cameroonian cultural heritage, ethnic communities, traditions and stories. Planned features include an AI-supported chatbot, quizzes, local-language lessons, progress tracking and an administration interface. Technologies: Python, Flask, SQLite, JavaScript, HTML/CSS and AI API integration.

MediScan AI — AI-Assisted Health Information Concept

A platform concept for organizing user-provided symptom information and presenting AI-generated explanations to support understanding. It is intended as informational support, not a medical diagnosis or substitute for professional care.

TryOns / Tryon Space — AR E-commerce Website

A web shopping experience concept featuring augmented-reality product try-on and responsive interfaces. Technologies: HTML, Tailwind CSS, JavaScript, Node.js, Express and MongoDB.

U-Trust — Personal Expense Tracker

A personal-finance application concept intended to help users record expenses and build better money-management habits, with FCFA as the planned default currency.

COMPUTING SKILLS

Programming: Python, JavaScript, Java, C++
Web development: HTML, CSS, Tailwind CSS, Node.js, Express
Frameworks and databases: Flask, SQLite, MongoDB
AI and tools: AI API integration (Google Gemini/OpenAI), LabVIEW, Figma (design/planning exposure)
Other: Responsive interface development, basic application design, debugging and project documentation

RESEARCH INTERESTS

Software engineering; AI-enabled applications; human-centred digital products; cultural heritage technology; web application development and practical uses of data-driven systems.

LANGUAGE SKILLS

English — proficient. Other language proficiency can be added where applicable.

ADDITIONAL INFORMATION

Awards, scholarships, conference/summer-school participation, publications, research presentations and teaching experience have not been included because no verified details were available for this draft. Add any relevant items before submitting if applicable.
